Join “ENSSAT” summer school
Connecting your IoT devices

in Lannion, Brittany, France
June 24th - July 4th 2020

Advanced Bachelor and Master students, in the field of Digital Sciences and Technology (Electronics, Computer Science...) will experience outstanding hands-on courses, meet international friends and experience the beautiful Breton summer.

About the school
ENSSAT is a Grande École in Rennes 1 university affiliated to the Mines-Télécom Institute and is specializing in science and technology. It is also a leading research hub in the fields of telecoms and emerging technologies.

Visit to the Cité des télécoms.
Develop a prototype for innovative IoT applications.

Discover Lannion’s historical town center.

Enjoy water sports.

The programme

- The "Connecting your IoT devices" summer school is organized to offer 3 ECTS in the fields of digital electronics, embedded software and networking for IoT. Both hardware and software aspects of IoT will be presented and discussed during the school, and hands-on practical courses will allow attendees to familiarize with IoT standards.

- An introduction to the French language and culture will also be included.

- Social activities, companies and local visits will make your stay enjoyable.

Programme fees: 870 €

Included: supervised courses, accommodation (hotel IBIS), meals, excursions, company visits.

Not included: personal expenses, visas, flight, personal insurance.

A smart device box including a motherboard, sensors and a wireless transceiver will be offered to each attendee at the end of the summer school!
